

# Tenable SecurityCenter Management Dashboard

The Unmanaged by Tenable SecurityCenter widget lists those IPs not managed in the Tenable SecurityCenter. Lumeta 3.3 pushes metadata about these IPs to the Tenable SecurityCenter where they are made available to SecurityCenter users as an asset list.

## IPs Unmanaged by Tenable SecurityCenter

IP Address	Mac Address	Active	devicetype	os	zonename	First Observed	Last Observed
fe80::32f7:dff:fe50:d5aa		true	Infrastructure	(Cisco)	Lumeta-333	05/21/2019 04:02:55 PM	05/18/2020 08:00:31
fe80::200:caff:fe11:2233		true			Lumeta-333	03/08/2020 02:54:53 PM	05/18/2020 08:00:31
2601:44:1:b9c0:e9b3:feca:a161:75dc		true			Lumeta-333	03/08/2020 04:09:14 PM	05/18/2020 08:00:31
2600:802:460:652::2		true			Lumeta-333	09/03/2019 11:33:07 AM	05/18/2020 08:00:31
2600:802:460:652::1		true			Lumeta-333	10/14/2019 12:51:08 PM	05/18/2020 08:00:31
2600:802:460:632:d03c:f4c5:a72c:7152		true			Lumeta-333	02/12/2020 06:52:58 PM	05/18/2020 08:00:31

Lumeta cannot "see" the IPs listed on the Unmanaged by Lumeta widget, indicating a lack of visibility into the network on which they are located. Check your Scout deployment.

## IPs Unmanaged by Lumeta

IP Address	DNS Name	score	severityCritical	severityHigh	severityMedium	severityLow	severityInfo
172.36.22.11	Pederson.corp.lumeta.com	58	0	0	0	0	10
65.246.245.31	firemon05.corp.lumeta.com	87	0	0	0	0	10
172.16.22.8	name4.corp.lumeta.com	67	0	0	0	0	10
65.246.245.25	lumeta88.corp.lumeta.com	10	0	0	0	0	10
172.36.22.15	Lumeta16.corp.lumeta.com	46	0	0	0	0	10
65.246.245.29	lumeta300.corp.lumeta.com	44	0	0	0	0	10

These IPs listed on this table are receiving the benefits of both Lumeta and Tenable SecurityCenter management.

## Tenable SecurityCenter and Lumeta Managed IPs

IP Address	active	First Observed	Last Observed	dns	score	severitycritical	severityhigh	severitymedium
172.18.1.201	true	05/21/2019 04:08:04 PM	05/18/2020 08:00:31 PM	Firemon201.corp.lumeta.com	12	11	13	13

## Lumeta-Indexed Data within the Tenable SecurityCenter

Following are illustrations of Lumeta-indexed data within Tenable SecurityCenter.

The screenshot shows the 'Vulnerability Analysis' section of the Tenable SecurityCenter interface. It displays a summary for the IP address 65.246.245.21. The summary includes a bar chart where the total number of vulnerabilities is 268, broken down into 138 high severity, 5 critical, and 19 info. The total results are 112. The interface also shows navigation options like Dashboard, Analysis, Scans, Reporting, Assets, Workflow, and Users, along with a user profile for API2 User.

The SecurityCenter Vulnerability Analysis summarizes the number and severity of vulnerabilities associated with a particular IP address.
