

Lumeta Self-Paced Training

To prepare for live training with one of our solutions architects or professional services providers, FireMon recommends that you become familiar with the terminology, concepts, and functionality of Lumeta systems. To gain this proficiency, take our self-paced training course, [Lumeta Training on Demand](#), located in the FireMon Learning Management System (LMS). This course is available at no cost to all FireMon and Lumeta customers.

Self-enrollment is available to FireMon, Lumeta, and DisruptOps internal users. The course is automatically made available to all new company employees. Once your new-hire data is processed, an account will automatically be generated for you in FireMon LMS. Please allow 24-36 hours. You will then receive a welcome email prompting you to reset your FireMon LMS password. Log in, then search for "Lumeta" to pull up the [Lumeta Training on Demand](#) course.

Customer & Partner Registration

Request login credentials via an email message to training@firemon.com. Please include the name of your company whether you are a FireMon customer or a FireMon partner. We'll get back to you with a UID and PW.

What's Included

The training is comprised of 6 modules of on-demand, self-paced training, followed by an optional exam that enables those who demonstrate sufficient product knowledge to become Lumeta certified.

Lumeta Training On Demand

Online Course
★★★★★

Course Content

Self-paced learning modules providing you with all you need to know about FireMon Lumeta—the world's most authoritative solution for network discovery and hybrid cloud visibility.
